

PADS & SHIMS

OVER 1 MILLION MILES OF TRACK SOLUTIONS

IRON HORSE
ENGINEERING COMPANY

www.ironhorseeng.com || p. 440.548.2005 || f. 440.548.2115 || sales@ironhorseeng.com

We carry a wide variety of shims and pads for every rail application, whether it is a DF job, embedded track, ballasted track or bridge. We offer canted HDPE, UHMW, Rubber, Reinforced Rubber, EVA, or custom materials.

Tie Pads : Placed between the tie plate and the tie to prevent tie-cutting and rail wear.
Increases the life of tie.

High Tensile Strength
55-95 Duro, Shore A
Fiber Reinforced (optional)
UV Stabilized

Rail Pads: Placed between the rail and the tie plate to prevent rail seat abrasion, allowing cant to remain at 1:40 and reducing rail wear.

Available in standard and custom sizes
EVA, UHMW, HDPE, Rubber,
or custom material
Low Coefficient of Friction

We also manufacture **Under Tie Pads** (UTPs, Soffet Pads), **Elastomeric Bearing Pads**, and **HDPE Shims**.
