Our Elastomeric Rail Seal has a dual durometer surface that allows for better wear resistance. It is used in grade crossing for freight, commuter rail, LRT and streetcar.

- Benefits**
- Improved crossing life
  - Reduces noise & vibration
  - Improves pedestrian & cyclist safety
  - Quicker installation, reducing costs
  - 100% Recyclable & Made in USA

- Features**
- Hardened road surface utilizing dual-durometer technology
  - Clamps distribute force across more material for better looking installation
  - Large inventory for quick lead times
  - Custom lengths, colors and profiles available

Following Profile are kept in stock, 136/132RE, 115RE, 115 Restraining Rail, 100RA 90lb & 85lb and crane rail.
